Hello Snigdha here Btech Second Year

This is in strong disapproval of your reaction to my polite question. It is not expected that a member of iit fraternity express his views on a public platform with such poor choice of words or stickers or gifs or any other means of communication. The response should always consider the dignity of the person concerned, especially if the person is a female. A few years from now, you shall be entering the job market with an iit stamp. With such distasteful ways of expressing yourself, you shall face a strong rebuke from your colleagues. I would warn you to be vary of your words and expression and today they have definitely fetched my extreme criticism and sympathy. I have sent my concern to all people who replied to my question inappropriately, privately. 2:27 pm
